

REHABTECH

Rehabilitation Technologies of Syracuse, Inc.

HELPING OUR PATIENTS REACH THEIR GOALS

When it's time for patients to regain their mobility, the practitioners at REHAB TECH are prepared to provide the highest level of care and service.

Working as a team with the patient, physician, physical therapist, and family members, we look at every case as being unique ... because it is. Customized care is what we provide, ensuring that every patient attains the best possible outcome.

Our board-certified practitioners listen, ask questions, and discuss personal goals so that we can craft the prosthesis or provide the orthosis that best suits the patient's individual needs and expectations. It's what differentiates us from other prosthetic labs.

Our primary concern is that patients receive the best-fitting and most comfortable prosthesis or orthosis to assist in recovery.

HELPING OUR PATIENTS REACH THEIR GOALS

Mike and Terry Hall established REHAB TECH in 1988 and continue their commitment to provide the highest level of care and service to the Syracuse area. Their son, Jeremy Hall, also a certified practitioner, joined the practice in 2001.

Our practitioners and technicians keep current with the use of advanced technologies and innovative techniques in the design and fabrication of our upper and lower limb prosthetic and orthotic devices. Our facility is fully accredited by The American Board for Certification in Orthotics and Prosthetics, Inc. (ABC). Accreditation for both practitioners and facilities is the most highly regarded achievement and represents attaining the most stringent level of standards in the field of orthotics and prosthetics.

We would be happy to discuss with you in greater detail just how REHAB TECH can substantially restore and preserve the well-being of your patients. You or any of your staff members are always welcome to tour our facilities, or we'd be happy to visit your office at a mutually convenient time.
