

Our primary concern is that you receive the best-designed and best-fitting orthosis or prosthesis to assist in your recovery. Our dedication, coupled with your cooperation and enthusiasm, should result in our mutual goals achieved.

Location and Parking

Our office is located in the Erie Medical Plaza at 1101 Erie Boulevard East. It is near Routes 81 and 690, and reached easily from any Syracuse hospital. There is convenient off-street parking, and our building is handicapped accessible. As stated earlier, should you need a wheelchair, please inform the receptionist when you set your appointment and one will be available when you arrive.

Although your medical coverage is a contract between you and your insurance company, our support staff is happy to assist in filling out forms and communicating with insurance personnel to ensure proper payment for services. Insurance cards and any preliminary authorization forms should be brought at the time of your first visit.

Your First Office Visit

When you arrive for your initial appointment, you will be more comfortable if you bring a robe and/or pair of shorts for greater privacy during evaluation and fitting. If the orthosis or prosthesis you will be receiving involves a shoe, it is also advisable to bring one which can be left at our office for fitting.

Please inform the receptionist in advance if you will need a wheelchair, and remember to bring your insurance cards and/or insurance forms.

Our Pledge to You

We appreciate your selection of Rehab Tech. We pledge to make your experience as pleasant as possible. You will be well instructed about what to anticipate and how to care for yourself and your appliance. Should any problems develop, we will make adjustments until you, your physician, and we are satisfied.

Welcome!

The practitioners and staff of Rehabilitation Technologies of Syracuse, Inc. (Rehab Tech) welcome you to our facility and our full range of prosthetic and orthotic services. We take great pride in serving those who, through illness, accident, birth defect, aging, disease, or injury, need assistance to meet the demands of daily living. Our mission is to help you reach your recovery goals.

Should you have any questions which are not answered in this brochure, please ask. We want there to be no mystery about what we do for you. Your understanding of the prosthetic or orthotic device you are here to receive will assist both our work and your rehabilitation progress.

We will work together with you to achieve the best results. Everyone here at Rehab Tech looks forward to a successful outcome for you.

Our Services

At our fully staffed and equipped facility, we are able to design, measure, fit, and fabricate a complete range of orthotic and prosthetic devices. We welcome patients of all ages and tailor our services to meet their individual needs. Our modern fabrication laboratory offers the latest in technological equipment, and our practitioners keep abreast of the most recent advances in the field of orthotic and prosthetic techniques.

Should you, your doctor, or your therapist have a question regarding any specific device or accessory, please don't hesitate to contact us.

Providing the Highest Level of Care

Every profession sets standards of quality. Orthotics and prosthetics rehabilitation specialists must meet the rigorous requirements set by the American Board for Certification in Orthotics, Prosthetics, & Pedorthics Inc. (ABC) in order to become accredited. Both the staff and our facility have achieved ABC accreditation, ensuring the highest possible quality of care. Our practitioners maintain their certification through continuing professional education courses, seminars, workshops, and in-services. This also keeps us abreast of new technology and improved designs, enabling us to select from among hundreds of components those which will function most effectively for each person. But our practice is more than just fitting you with a prosthesis or orthosis. We continue providing personalized, superior care for you as long as it's necessary.

Our Board Certified Staff

Established in 1988, Rehab Tech is a family-owned and operated company headed by Michael T. Hall, a board-certified prosthetist and orthotist. Terry Hall is a certified fitter of orthotics (CFO) and also handles duties as the office manager. Mike and Terry's son, Jeremy Hall,

CP, is the third generation of Halls to become a certified prosthetist.

Our professional associations include membership in the American Orthotic & Prosthetic Association and the American Academy of Orthotists and Prosthetists.

Office Procedures

A physician's prescription is required to receive professional services from Rehab Tech. Staff members are happy to consult with your physician concerning your particular needs or, if requested, assist you in obtaining a doctor's referral for services.

Appointments may be made by calling (315) 426-9920 during regular office hours which are 8 a.m. to 4:30 p.m. Monday through Friday. If you are unable to come into the office, special arrangements may be made. We also provide services to hospitals and nursing homes.

Insurance Information

Rehab Tech is an approved provider for Medicare, Medicaid, and the Veterans' Administration. We also work with a variety of insurance agencies, health maintenance organizations (HMOs), and governmental agencies.
